Hi David/Bruce,

We received a query from the Director of Government Affairs for the Tire Industry Association related to the tire crumb study. Below is a response and the query is at the bottom. Annette has reviewed and wanted to run it through the approval process before we send it. Carolyn, Jennifer and Lou have reviewed as well and their edits are incorporated. Please let me know if you have any edits or concerns.

Thanks,

Kelly

Dear Mr. Littlefield,

Deliberative Process / Ex. 5

Best Regards,

Query:
Jose and Annette,

My name is Roy Littlefield and I am the Director of Government Affairs for the Tire Industry Association. We represent over 14,000 members in the tire industry. Our members have an interest in the EPA study on crumb rubber that is ongoing. I was wondering if either of you could provide me with an update on where the study is in its current stages and any other information you would be willing to share. We are hearing from members almost daily who are hearing rumors that the study is close to release but we have not confirmed that with them because we are unsure. I hope this can open a dialogue and if you both are not currently working on this issue, could you please assist in pointing me in the right direction. I understand that some information is not yet public but anything you can share would be helpful. We are located right outside of Washington and can always arrange for a meeting as well.

Thank you for your time and consideration.
Roy Littlefield IV
Director of Government Affairs
